If you played chapter 1, this is basically more of the same. The story is good, the combat is "ok", everything else is not ok. More than half your play time will be loading screens. Frequently a level loads, you walk through it in under 30 seconds, and you get another loading screen. I'm not sure I ever spent more than 2 min on any one place so you literally are loading every 60-90 seconds, tops, and often much more often than that.

Tbh I'm not sure its worth $5. I like the dialogue and the over all storyline but that's about it. Hopefully following chapters will address some of these other issues.
